DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Reinecke(US4790606).

Reinecke discloses all the limitations of the instant claims including: modifying the slowdown at the at least one wheel brake (note column 5, line 9 “torque regulation”), wherein the at least one suitable measure is performed as a function of at least one of a comparison of a recorded braking variable to at least one predefined threshold value, a driving situation, and an operating state of a vehicle component located in the vehicle during a braking procedure. For instance, note warning feature, column 5, lines 10-11.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Zenzen et al (US6460941 B1).

ZenZen discloses all the limitations of the instant claims including: modifying the slowdown at the at least one wheel brake (step 5), wherein the at least one suitable measure is performed as a function of at least one of a comparison of a recorded braking variable to at least one predefined threshold value, a driving situation, and an

operating state of a vehicle component located in the vehicle during a braking procedure. For instance, note steps 3-4.

Response to Arguments

Applicant's arguments filed 11/21/2005 have been fully considered but they are not persuasive.

Applicant's response has been considered, however the arguments fail to identify any particular claim limitations or reasoning as to how the claimed invention defines over the prior art. The features identified by Applicant do not appear to be defined or required by the claim language. For instance, the claims fail to require recording of a real (actual) retarding force as argued by Applicant with respect to Reinecke and Zenzen, the consideration of overall deceleration as argued with respect to Zenzen, and the command responsive to gas pedal operation or effects of the modification of the deceleration as argued with respect to Schmidt. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). It is maintained that the rejections are proper.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
